## DANGER

- DO NOT throw the light directly into human eyes. This may cause temporary blindness or permanent damage to the eyes.
- The battery can only be charged while installed in the flashlight. When charging, please use the provided charger for your light.

## WARNING

- Keep out of reach of children.
- If the light is about to be put aside for a long time or be transported, please unscrew the body for half a circle to cut off the circuit.
- DO NOT activate the turbo mode multiple times continuously when the environmental temperature is high in case the flashlight body is too hot to hold.
- Ensure the battery is inserted with the negative (-) end pointing to the head of the light (LED side).
- Store the battery with care, if the battery needs to be changed, please take good care of the battery taken out. DO NOT mix it with the conductive metals.

## NOTICE

- Moonlight and turbo mode are not the normal brightness levels (low, medium, and high mode). Under moonlight and turbo mode, press and hold the switch to enter the normal brightness level cycle.
- When the light is turned on, the light will return to the last used setting. Only moonlight, low, medium, and high mode can be memorized when the light is turned off. If the light is turned off on turbo mode, it will revert to the medium setting after 10 minutes. SOS mode cannot be memorized.
- Active thermal management: On turbo mode, overheating can be avoided by adjusting the power output.
- Turbo mode will stay on for 1 minute and then step down to high mode within 30 seconds, only by 1-minute waiting, double click the switch will access turbo mode again.
